Porzellan of Limoger.

Our scratch-proof and color-fast porcelain door handles and knobs are made of

moulded porcelain. The porcelain is pressed into a metal mould and heated to 1400° C; afterwards they are framed in a brass ring. Delivery without screws.

Note: The actual pair of handles or pair of knobs and a set of rosettes must be purchased separately.

PORCELAIN DOOR HANDLE 1 SET

This sturdy door handle is made of black or white porcelain. The nickel-plated brass angle makes it extremely durable.

2 handles without rosette. Handle length approx. 11 cm, max. 2.7 cm Ø. Weight 320 g. Two brass spacer rings and allen key are included.

- Brass blank, white (without picture)** Order no. **179965**
- Brass nickeled, black** Order no. **159844**

Sounds better. Is better. Our ringer bell.

It has an electric bell from the sixties and a black thermosetting plastic housing accommodates reliable electrics and mechanics. These nice sounding gadgets should not be connected to the mains but to a bell-wire with an upstream transformer (output voltage 8-12 V~). By simply dismantling your old doorbell and replacing it with this model you are not doing anything wrong (acoustically and electrically).

CONE RINGER DOORBELL IN THERMOSETTING PLASTIC HOUSING

Cone bell made of nickel-plated steel.
Volume 87 dB (A). Height 15 cm, width 7 cm, depth 8.5 cm. Weight 260 g. Order no. **175074**

FLAT RINGER DOORBELL IN THERMOSETTING PLASTIC HOUSING

Flat bell made of nickel-plated steel.
Volume 84 dB (A). Height 15 cm, width 7 cm, depth 3.5 cm. Weight 200 g. Order no. **179983**

Iron Doorbell From Germany

What a beautiful noise... This is really what used to be a corridor bell, as it was originally used for flats in apartment blocks. But the neat bell mechanism, made completely without the use of plastic components, can also be heard in the average-sized family house. The key twist mechanism is designed to fit doors of 6 cm thickness, but can be shortened for thinner doors by cutting the square shaft with a hacksaw. The German-made doorbell is intended for indoor use only, as constant exposure to moisture will cause the material to rust.

IRON DOORBELL

Iron chromed. 6.5 cm Ø, weight 150 g.
Order no. **135070**
